PROGRESSPATH

A STUDENT PERFORMANCE TRACKING
SYSTEM WITH OUTCOME-BASED
EDUCATION STANDARDS

PROJECT IDEA

Develop ProgressPath, a web-based student performance tracking system that:

- Monitors and records student academic performance
- Aligns assessments and outcomes with Outcome-Based Education (OBE) standards

OBJECTIVES OF PROGRESSPATH

GENERAL OBJECTIVES

Develop ProgressPath, a web-based Outcome-Based Management System that empowers educators and students by providing a centralized platform to monitor, evaluate, and enhance academic performance in alignment with Outcome-Based Education (OBE) principles.

SPECIFIC OBJECTIVES

Develop ProgressPath, a centralized web-based system that tracks student performance against OBE standards, manages academic records efficiently, and delivers progress insights with actionable feedback to support student success

Evaluate usability using user testing with the System Usability Scale (SUS) and Usability, Satisfaction, and Ease (USE).

METHODOLOGY

RESULTS AND DISCUSSIONS

USER TASKS

FOR STUDENT

- Log in account
- View assigned task
- Submit a task
- Attempt to submit a task after the deadline
- View grades and feedbacks

FOR ADMINISTRATOR

- Log in account
- Attempt to create a program without required information
- Create a new program
- Create a program outcome
- Assign IDE (Introductory, Demonstrative, Enabling)

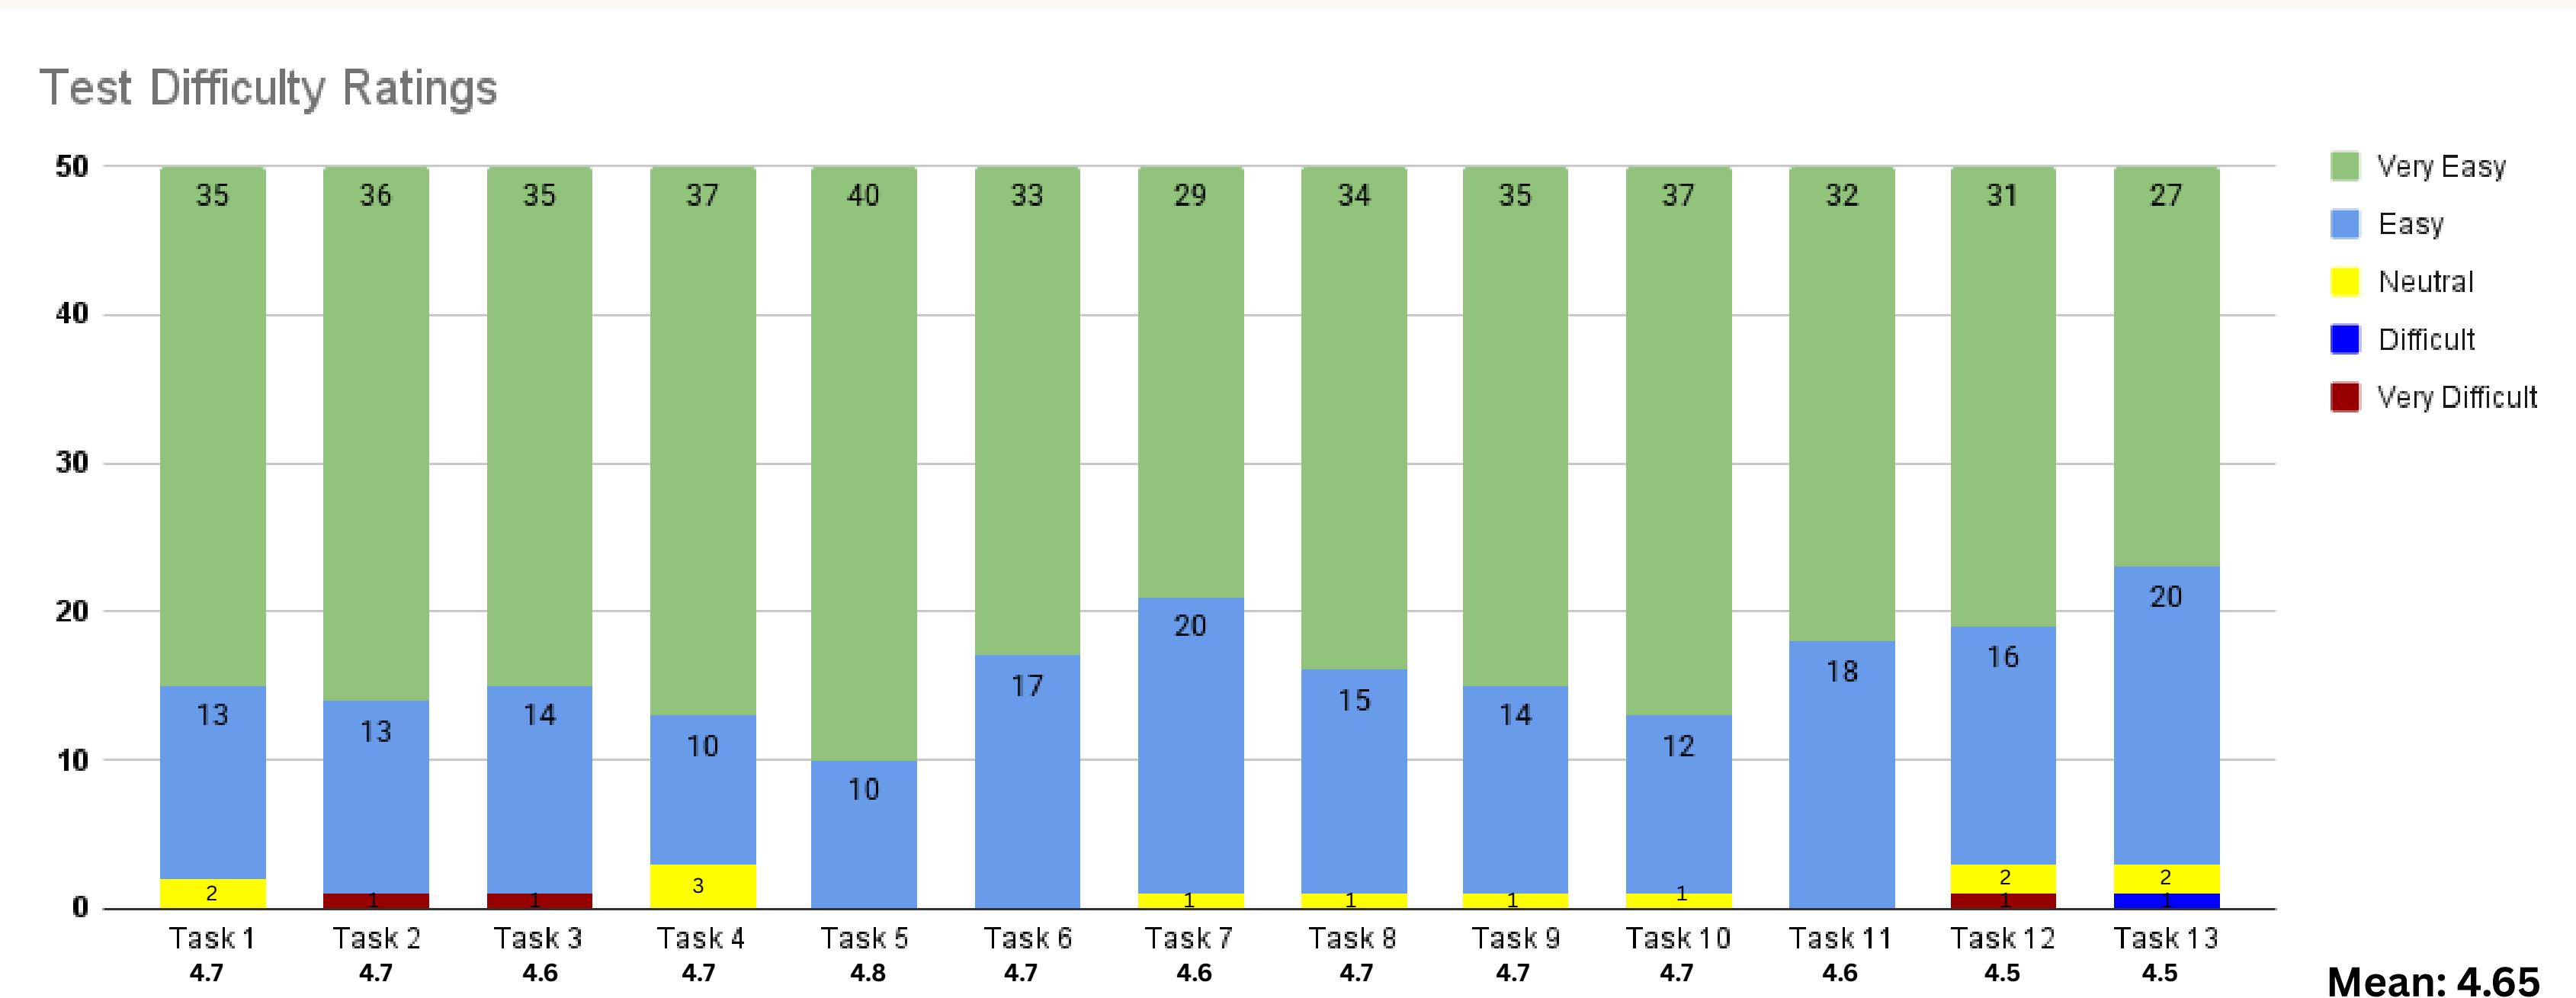

FOR FACULTY MEMBERS

- Log in account
- Assign a task
- Grade submitted task and provide feedback

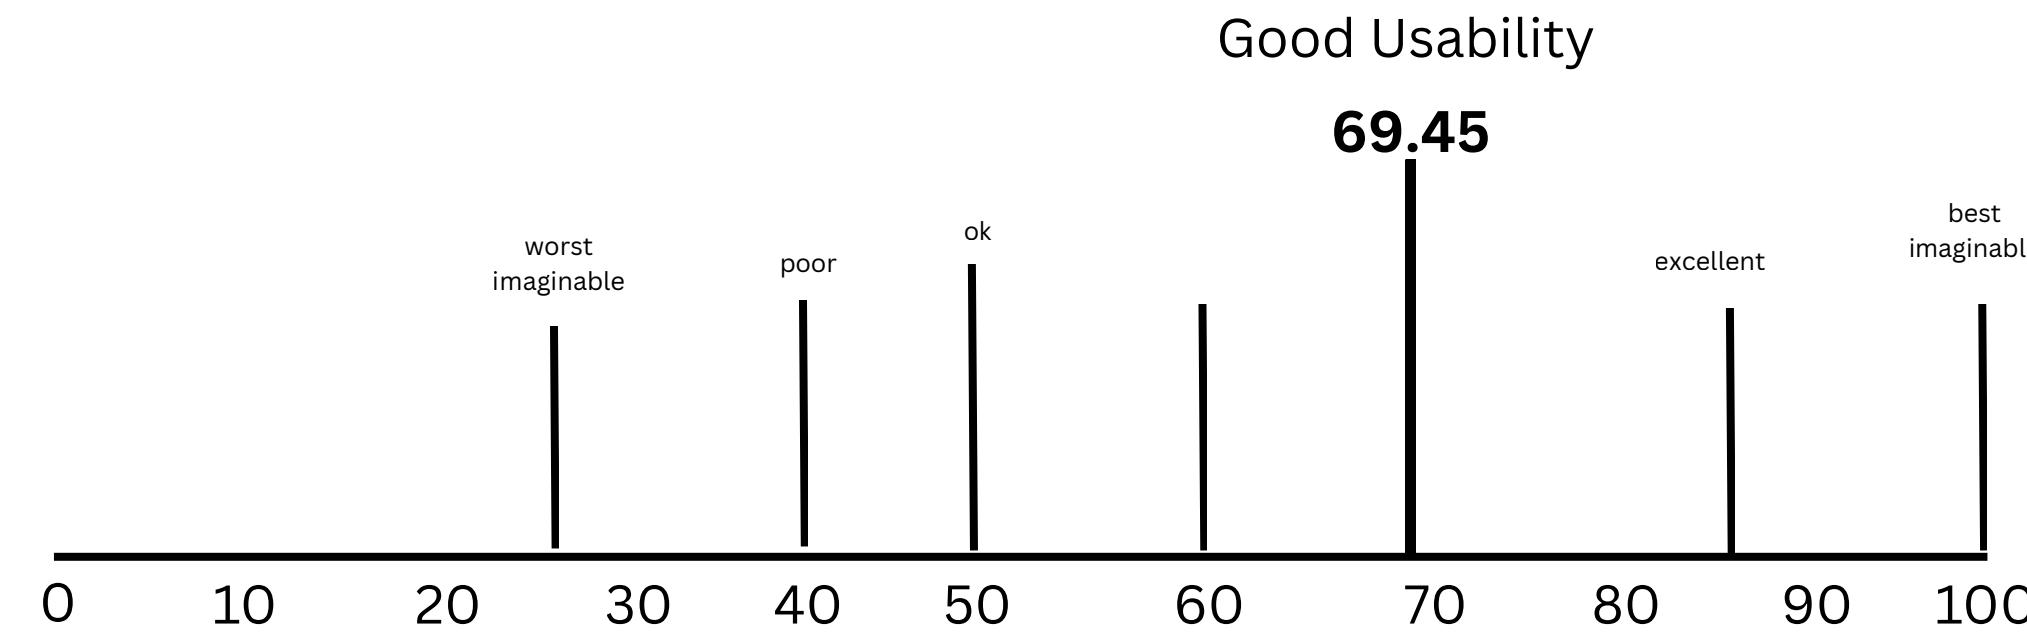

100%

CONCLUSION

ProgressPath was successfully developed as an Outcome-Based Management System that provides a centralized and efficient web-based platform for monitoring, recording, and evaluating student performance in alignment with Outcome-Based Education (OBE) standards.

RECOMMENDATIONS

IMPROVE

Improve student progress analytics by adding clearer outcome-based dashboards, visual charts, and automated alerts for students who are falling behind expected learning outcomes.

STRENGTHEN

Strengthen access control and data security by enhancing role-based permissions and implementing additional authentication measures for faculty members and administrators.

AUTOMATE

Automate academic reporting and outcome evaluation to reduce manual encoding, minimize human error, and ensure consistent alignment with Outcome-Based Education standards.
